

# ClaySlick<sup>TM</sup>

Release Agent – excavator buckets, loaders n skips

DESIGNED TO ELIMINATE – MUD & CLAY

# ClaySlick™

Biggest problems for excavator operators are sticky clay soils that cling on the back or inside of the buckets every time you are excavating or trenching.

## ClaySlick™ helps keep production up and costs down

ClaySlick™ non-stick industrial coating helps prevent materials from sticking to excavator surfaces and reduces downtime for cleaning.

Using ClaySlick™, excavators operate more efficiently while the frequency of cleaning and wash times are reduced

- Ready to use
- No mixing or dilution is required
- Economical – 1 litre covers 100m2
- Doesn't damage paint and rubber seals
- Reduces clay build-up on excavator buckets
- BioGreen, Non-Toxic & Non-Hazardous
- Requires infrequent applications
- Increases lubricity
- No corrosion n Rust.
- Works in extreme temperatures 45°C and -10°C
- Don't let mud & clay slow down
